# Filling Compound for Multi Core Tube

### Description

**DYM-8452NFR** is a thermoplastic, non-halogen, low smoke and flame retardant filling compound for multi core tube based on EPDM.

## Specification

IEC 60502

BS 7655

### Typical Physical Electrical Properties

| Test items                                | Test method   | Unit   | Value                |
|---|---------------|--------|----------------------|
| Specific gravity at 23°C                  | ASTM D 792    | -      | 1.70                 |
| Tensile strength at break(50mm/min)       | IEC 60811-501 | MPa    | 5                    |
| Elongation at break                       |               | %      | 100                  |
| Pressure test at high temp. (75°C, 30min) | IEC 60811-508 | %      | 5                    |
| Heat shock test (150°C, 1hr)              | IEC 60811-509 | -      | Pass                 |
| Cold impact test (-15°C)                  | IEC 60811-506 | -      | Pass                 |
| Oxygen index                              | ASTM D 2863   | %      | 45                   |
| Smoke density (Flaming mode)              | ASTM E 662    | DS max | 140                  |
| Halogen acid gas evolution                | IEC 60754-1   | %      | 0                    |
| Corrosivity of gases                      | IEC 60754-2   |        |                      |
| рН  |               | -      | 4.8                  |
| Conductivity                              |               | μs/cm  | 60                   |
| Hardness (Shore A)                        | ASTM D 2240   | -      | 90                   |
| Mooney Viscosity ML 1+4 at 140°C          | ASTM D 1646   | -      | 54                   |
| Volume resistivity                        | ASTM D 257    | Ω·cm   | 2.2×10 <sup>14</sup> |

<sup>\*</sup> Data should not be used for specification work.

#### **Processing Techniques**

Recommending standard extrusion temperature profiles of DYM-8452NFR are as follows;

Unit: °C

| Zone 1 | Zone 2 | Zone 3 | Zone 4 | Zone 5 | Adapter | Head  | Die   |
|--------|--------|--------|--------|--------|---------|-------|-------|
| 90±5   | 95±5   | 95±5   | 100±5  | 105±5  | 110±5   | 115±5 | 120±5 |

It is recommended that this product can be used conventional rubber extruder.

Specific recommendation for processing conditions can be determined only when the application and type of equipment are known. We recommend hopper drying at 60°C for 4 hours to remove moisture before extrusion.

# Filling Compound for Multi Core Tube

### Color & Appearance

This compound is a basic black color, but colorable, and is supplied in ribbon or pellet form.

#### **Packing**

Form: 700kg Cardboard Box (Inner PE bag packing)

### Handling

To ensure health and safety, Material Safety Data Sheets(MSDS) is available on request.

#### Storage

Should be stored at room temperatures between 10~40°C. Recommended maximum storage period in a dry and clean place is 12months unopened and in original packaging after the manufacture.

#### Disclaimer

The product can be used only for the application as specified here above. It is the customer responsibility to inspect and test our products to satisfy the suitability of this product to customer's particular purpose. No liability can be accepted regarding the use of our products in conjunction with other materials. No warranties shall be offered which extend beyond the description contained here above. The above-mentioned information relates exclusively to our products when not used in conjunction with any third party materials.
